### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claim(s), in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in claim(s) 18-31, wherein the claimed invention comprises a method for driving an electrophoretic display, the display comprising: a plurality of switching elements, with one of each of the switching elements being provided at a corresponding one of each of the intersections of data lines and scanning lines, with an on/off control terminal being connected to one of the scanning lines passing through one of the intersections, and the method comprising: migrating to a position for desired gradations of an image displayed in the pixels, during a time period corresponding to the desired gradations; after application of the constant voltage to said data lines, applying a brake voltage for braking the pigment particles to the data lines during a time period, the time period determined based on fluid resistance of the fluid and the desired gradations; and after application of said brake voltage to the data lines, applying said common voltage to the data lines, as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
